SUMMARY

Aspiring Software Engineer with foundational skills in programming, specializing in **C++**, **Java**, **Python**, as well as **HTML**, **CSS**, and **JavaScript** for front-end development, and a solid understanding of algorithms and problem-solving. Knowledgeable in **data structures**, algorithms, and software development methodologies. Experienced in tools such as **Visual Studio Code** and **Git**.

EXPERIENCE

junoir haramaya university student 2022 - Present
Haramaya University Phoenix, AZ

- **Software Engineering Student**
Haramaya University | 2022-2027
Gained foundational knowledge in programming, algorithms, and data structures.
Collaborated on academic projects to develop practical software solutions.

Software Engineer Intern 2022
Shashamane public health shashamane ,ethiopia

- **Shashamane Public Health Office**
Assisted in developing and maintaining software systems to support public health initiatives. Gained hands-on experience in project management and software deployment in a real-world environment.

EDUCATION

BS:Software Engineering 2022 - 2027
harar, Ethiopia
GPA | 3.32 / 4.0

TECH STACK

Python · Java · C++ · html · css ·

javascript · sql

frontend development

Database

KEY ACCOMPLISHMENTS

Achievements Successfully completed an internship at Shashamane Public Health Office, contributing to the development and maintenance of software systems.

- **Successfully designed and developed a responsive portfolio website showcasing academic and personal projects.**
- **Designed and developed a responsive portfolio website, showcasing academic and personal projects. Demonstrated problem-solving expertise by debugging and optimizing class exercise projects in C++ and Python. Actively participated in team-based academic projects, strengthening collaboration and project management skills.**

STRENGTHS

✎ Hard-working

- Strong analytical and problem-solving abilities, demonstrated through academic and project work.
- Adaptability and eagerness to learn new technologies and frameworks.

🏠 Solving complex problems

Due to my Law and Software engineer education

- Effective teamwork and collaboration skills, enhanced through group-based academic projects.
- Proficiency in written and verbal communication, essential for documenting and presenting technical concepts.
