KEY ACCOMPLISHMENTS

Achievements Successfully completed an internship at Shashamane Public Health Office, contributing to the development and maintenance of software systems.

- Successfully designed and developed a responsive portfolio website showcasing academic and personal projects.
- Designed and developed a responsive portfolio website, showcasing academic and personal projects. Demonstrated problem-solving expertise by debugging and optimizing class exercise projects in C++ and Python. Actively participated in team-based academic projects, strengthening collaboration and project management skills.

SUMMARY

Aspiring Software Engineer with foundational skills in programming, specializing in **C++, Java, Python**, as well as **HTML, CSS, and JavaScript** for front-end development, and a solid understanding of algorithms and problem-solving. Knowledgeable in **data structures**, algorithms, and software development methodologies.

Experienced in tools such as **Visual Studio Code** and **Git**.

EXPERIENCE

Haramaya University

Phoenix, AZ

junoir haramaya university student

2022 - Present

- **Software Engineering Student**

Haramaya University | 2022-2027

Gained foundational knowledge in programming, algorithms, and data structures.

Collaborated on academic projects to develop practical software solutions.

Shashamane public health

shashamane

,ethiopia

Software Engineer Intern

2022

- **Shashamane Public Health Office**

Assisted in developing and maintaining software systems to support public health initiatives. Gained hands-on experience in project management and software deployment in a real-world environment.

EDUCATION

harar, Ethiopia

2022 - 2027

BS:Software Engineering

GPA | **3.32** / 4.0

STRENGTHS

- **Hard-working**

- Strong analytical and problem-solving abilities, demonstrated through academic and project work.
- Adaptability and eagerness to learn new technologies and frameworks.

- **Solving complex problems**

Due to my Law and Software engineer education

- Effective teamwork and collaboration skills, enhanced through group-based academic projects.
- Proficiency in written and verbal communication, essential for documenting and presenting technical concepts.
